Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users. \wp

The Phases High-level steps your user needs to accomplish from start to finish	LOGIN INTO THE WEB APPLICATION	UPLOAD THE IR IMAGE OF THE CYCLONE	CLICK ON THE PREDICTION BUTTON	WAIT FOR THE INFERENCE FROM THE SERVER
2 Steps Detailed actions your user has to perform	THE WEB APPLICATION HAS TO BE LOADED	FOR NOW USER CAN SELECT THE ASIAN SUB CONTEINENT FOR CYCLONE INTENSITY ESTIMATION	UPLOAD THE RESULT INTO THE WEB PAGE AND WAIT FOR THE INFERENCE	ONCE THE RESULT IS OBTAINED INTERPRET THE RESULT AND MAKE NECESSARY ARRANGEMENTS
3 Feelings What your user might be thinking and feeling at the moment	CORRECT ESTIMATION HELPS US TAKE THE NECESSARY STEPS FOR SURVIVAL	THE SATELLITE GIVE THE CORRECT DATA WHICH CAN BE USED FOR FURTHER STUDEIS		
	SOMETHIMES BECAUSE OF THE SATELLITE FAILURE WE CANT GET THE IMAGE	SOMETIMES WE CANT ABLE TO DIFFERENTIATE BETWEEN CYCLONE AND LOW PRESSURE REGIONS
